

Maintain-It-All™

PROGRAMMABLE CHEMICAL METERING PUMP

INNOVATIVE ACCESSORIES

The Maintain-It-All Pump is available with several innovative accessories that allow the pump to be used in a variety of applications.

When outfitted with the misting nozzle kit, the Maintain-It-All Pump is capable of spraying deodorizers, odor neutralizers, biocides, and insecticides at a rate of 4 ounces per minute in pre-programmed intervals.

The misting nozzle comes with Norprene tubing and takes less than a minute to install. It has an internal screen to prevent clogged nozzles and is compatible with all water-based and solvent-based products.

For use when the Maintain-It-All Pump is needed in remote places and can't be mounted on a wall or other permanent surface.

Provides a secure mounting surface for both the 115-volt "plug-in" and 6-volt battery operated Maintain-It-All Pumps. Made of durable, heavy-duty stainless steel so that it can withstand years of abuse. Installs in just seconds onto the lid of any 5-gallon or 7-gallon bucket.

SILICONE TUBING

Standard tubing for the Maintain-It-All Pumps. Compatible with most products with the exception of solvents. Works with all biological and enzymatic products as well as products with a high pH or a low pH. Lasts up to 3 years.

VITON TUBING

Optional tubing for the Maintain-It-All Pumps. Compatible with solvent-based products such as Grrreat Grape, C-Cide, and Floating Lift Station Degreaser. Lasts up to 3 years.
